Luvs tests on animals

## Avoiding animal testers

Please be advised that just because a company does not test on animals, even if they don't "cruelty-free" logos from animal welfare charities, it does not mean they are free of animal products.

Plenty of products which proclaim they are free of cruelty nevertheless contain the products of tortured and slaughtered animals.

Sometimes finding products not tested on animals can be difficult. We advise you to do the best you can and use this list to help you.
